Preface

The *Electronic Data Exchange (EDE) Technical Reference* is designed to meet the reference needs of programmers and data processing staff.

The Department of Education (ED) provides two types of software to EDE participants: EDEExpress for Windows and EDconnect.

EDEExpress for Windows

EDEExpress is a financial aid management software package provided to Title IV financial aid administrators (FAAs) by the U.S. Department of Education (ED). With EDEExpress, you can manage Title IV student financial aid application data, package awards, and exchange origination and disbursement data with the Common Origination and Disbursement (COD) System for Direct Loans, Pell Grants, the Academic Competitiveness Grant (ACG), and the National Science and Mathematics Access to Retain Talent Grant (National SMART Grant).

Free Application for Federal Student Aid (FAFSA) correction entry functionality through EDEExpress is accomplished using an interface with FAA Access to CPS Online, utilizing embedded browser technology within EDEExpress. You submit the data through the Web interface and processed results are returned to your Student Aid Internet Gateway (SAIG) mailbox.

To enroll for access to the FAA Access to CPS Online Web site, go to the SAIG Enrollment Web site at FSAWebenroll.ed.gov.

You can incorporate electronic FAFSA and correction functionality into your institutional system. This technical reference provides sufficient information for you to develop your own software or to develop software bridges between your own systems and EDEExpress, as well as some Web site functionality provided by ED for sending and receiving FAFSA data. The processing steps for your own software remain essentially the same as the EDEExpress processing steps. This technical reference includes information about record layouts, required edits, print assistance, and reject messages that are applicable for electronic FAFSAs, Institutional Student Information Records (ISIRs), electronic corrections, signature records, and the Academic Competitiveness Grant (ACG) Data file.

EDconnect

EDconnect software is used for sending and receiving electronic files from the SAIG.

Electronic FAFSA

After a student has completed and signed their FAFSA, a school's authorized FAA staff may submit it electronically by entering the data on the FAA Access to CPS Online Web site or by transmitting it to the Central Processing System (CPS) in a formatted ASCII file format. The CPS transmits processed FAFSA records back to the school's destination point as ISIRs in the IDAP08OP message class.

The Record Layouts section of this technical reference includes information on record layouts, including the FAFSA Application Export Record Layout (EAPS08IN). Reject codes are found in the Processing Codes section. Procedures for handling rejected FAFSAs are located later in this section and in the EDE Processing section. The Printing section includes details on printing ISIRs.

Renewal FAFSA Process

Each year the CPS creates a Renewal FAFSA for each student who is eligible to participate in the renewal application process. The Renewal FAFSA saves students time and effort because it carries forward most of the prior year's FAFSA data. Students only update information that has changed and complete certain income and asset questions.

For more details about the 2007-2008 renewal application process, including information on 2007-2008 enhancements and student eligibility to participate, see the *2007-2008 Renewal FAFSA Process Guide*, which can be found on the Department of Education's Federal Student Aid Download (FSAdownload) Web site located at fsadownload.ed.gov, as well as on the Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

Institutional Student Information Record (ISIR)

The CPS generates and sends an ISIR to each school listed on the student's FAFSA, in response to the following input:

- FAFSAs or correction records from your school.
- Applications or corrections submitted using FAA Access to CPS Online.
- Electronic FAFSAs and corrections completed by another school.
- Web FAFSAs or corrections using FAFSA on the Web, Spanish FAFSA on the Web, Renewal FAFSA on the Web, Spanish Renewal FAFSA on the Web, or Corrections on the Web.
- Paper FAFSAs or corrections to a Student Aid Report (SAR).
- Updates to a student record for the ACG.
- Post-screening transactions from the National Student Loan Data System (NSLDS) or the Department of Homeland Security (DHS).
- System-generated transactions.
- Students calling the Federal Student Aid Information Center to correct their records, i.e. change of address, change of school, or data entry error.

Each school receives one ISIR for every student who lists that school on the FAFSA. Servicers receive only one ISIR per destination point. The CPS also sends ISIRs to state agencies that elect to receive ISIRs for legal residents and for students indicating a school in that state.

The Record Layouts section of this technical reference provides the ISIR Record Description/Data Dictionary record layout. The Processing Codes section includes information on reject codes, the appropriate action to take and the comment codes associated with the reject. Specifications for printing the ISIR are in the Printing section.

Electronic Corrections

Schools can submit corrections to the FAFSA data electronically.

You can find the Correction Record Layout in the Record Layouts section of this technical reference. Submit electronic corrections in the CORR08IN message class. Valid field content specifications are found in Section 4, Processing Codes.

Information about adding your Federal School Code to receive electronic data, making signature corrections, and using the Correction Record Layout is located in Section 2, EDE Processing.

Handling Record Level Rejected Records

If the specifications in this technical reference are not followed on a particular record, an EDE Record Level Error Report File that can be printed as an error report will be transmitted to you. (The layout is in the Record Layouts section.)

The EDE Record Level Error Report Import Record Layout contains the student's Social Security Number (SSN), name ID, transaction number, last name, first name, the Federal School Code, the CPS Correction # (number) in error, an edit code, an error code, and a text explanation for the reason the record was rejected. Each field in error is reported. If the record was rejected due to an invalid value, the CPS sends the actual value of the data received from the school. When a record has more than one field in error, the student's SSN is listed more than once in the EDE Record Level Error Import Report. See Section 4, Processing Codes, for additional details about rejects. The following is a list of message classes for reporting errors:

CORE08OP	Electronic Correction Errors
EAPR08OP	Electronic Application Errors
SIGA08OP	Signature Record Errors

What's New and Changed in the *EDE Technical Reference* for 2007-2008

Listed below are some of the significant changes to the Central Processing System. For a complete listing, refer to the *2007-2008 Summary of Changes for the Application Processing System* guide. You can find this guide on ED's Federal Student Aid Download (FSAdownload) Web site located at fsadownload.ed.gov, as well as on the Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

Database Matches

National Student Loan Data System (NSLDS)

- **Modified Codes Used in the Postscreening Process** – The NSLDS Postscreening Reason Code field is ISIR field number 274. The values for 02, Overpayment added, and 04, Overpayment resolved, have not changed; however these codes will also be used for the two new HERA grants, the ACG and the National SMART Grant.
- **Added Codes to the Postscreening Process** – NSLDS may return one of the three new postscreening reason codes for the NSLDS Post-Screening Reason Code which were added as a result of the HERA changes:
 - 16 = Grad PLUS Master Promissory Note status change
 - 17 = Fraud Conviction added
 - 18 = Fraud Conviction resolved
- **Records with Loans Discharged Due to Death Will Not be Sent to Students** – SARs for applicants that have one or more loans with a Loan Status Code of DD (defaulted and then loan holder died) or DE (loan holder died) will not be sent (mail or e-mail) to students. The ISIR will continue to be sent to the institutions listed on the record.

Selective Service

- **Date of Birth Range Updated** – The CPS increased the end date range by one year from 1987 to 1988. This is an annual change.

Social Security Administration

- **Records Processed after a Match with an SSN on the Death Master File** – In the past, if a system-generated transaction was processed after a record was found on the Death Master File (DMF), the resulting SAR was sent to the address (mailing and/or e-mail) on the record. We anticipate that this affected less than 25 applicants in 2006-2007, but because of the sensitivity of this issue, we will no longer send to applicants system-generated transactions that are created after a match has been found on the DMF. The ISIR will continue to be sent to the institutions listed on the record.

Edit Changes

The following edits are being implemented in 2007-2008 processing:

Warning Edits

- **Incremented Dates** – As part of our annual updates, we incremented the year references in the following warning edits:
 - **Date of Birth Edits (updated from 09/01/90 to 09/01/91)** – These edits are used to identify dependent students who appear unusually young to be applying for federal student aid. If the student was born after 09/01/91 he or she is 16 years old or younger.
 - **Year References in Process Date Edits Incremented by One Year** – Process date edits check for application and correction records that are processed after deadlines. Student records processed between 6/30/2008 and 8/20/2008 will have comment 125 set and records processed after 8/20/2008 will have comment 127 or 128 set.
- **New Warning Edits** – Warning edits trigger highlights on the fields and a comment will be added to the record. The new warning edits are applied to a record when the following conditions are met:
 - Parents' or independent student's tax return status is "Will not file" and sum of earned income is within required range to file a return as determined by the IRS

- Parent or student reports receiving Temporary Assistance for Needy Families (TANF) or Supplemental Security Income (SSI) benefits but does not report a value for Worksheet A and did not meet the Automatic Zero EFC conditions
- **2007-2008 Double Reporting Warning Edits** – The CPS performs double reporting warning edit checks by comparing certain data fields on the applicant’s 2007-2008 record and triggering edits if duplicative values are provided under certain conditions. These edits, and the corresponding SAR comments, are designed to prevent the student from double reporting income or assets, which would affect the calculation of the student’s EFC. The three new double reporting edits are set when the:
 - Student’s AGI equals income from Worksheet A. This edit already existed for independent students and parents but it is new for dependent students. Comment 93 will be set on the student’s SAR and ISIR.
 - Parents’ AGI is equal to the student’s AGI. This edit was a warning edit, but we are revising it to be a double-reporting edit. Comment 94 will be set on the student’s SAR and ISIR.
 - Parents’ income from Worksheet A equals Student’s income from Worksheet A. Comment 163 will be set on the student’s SAR and ISIR.

Reject Edits

- **Date of Birth Year Incremented** – We incremented the date of birth end-year references in Rejects A and B, which alert FAAs that the date of birth entered may be in error because the student is older than most students (greater than 75) or younger than most students (less than 16) pursuing a post-secondary education:
 - Reject A – Date of birth year equals 1900 through 1932.
 - Reject B – Independent student and date of birth equals 09/01/91 or greater, and date of birth is not equal to or greater than current year.

Other Edits

- **Professional Judgment Transactions** – To prevent schools from viewing or receiving transactions that contain professional judgments by other schools, students and FAAs will not be permitted to add new school codes to transactions that contain FAA Adjustment flags. The student or FAA must choose the next available transaction to make the correction. This change does not apply to transactions resulting from Dependency Overrides.

- **ACG Criteria Added to Determine if the Student is Eligible for Self-Identification** – The CPS will now look at the student's Grade Level in College (ISIR field 27, FAFSA question 24) and the Student's Date of Birth (ISIR field 12, FAFSA question 9) to determine if the student is eligible for the self-identification process for 2007-2008. When applying on the Web the student will have the option of answering the ACG questions, which prompt him or her to indicate the qualifying rigorous secondary school program of study he or she completed, if he or she is:
 - a U.S. Citizen
 - eligible for a Federal Pell Grant
 - a first or second year undergraduate student
 - 21 years of age or younger

The student can also provide the ACG self-identification information by calling the Federal Student Aid Information Center. A financial aid administrator can provide this information for a student when entering application information using FAA Access to CPS Online.

Note: The new criteria for 2007-2008 (first or second year undergraduate student and 21 years of age or younger) were added to improve the self-identification process for 2007-2008 by narrowing the criteria for allowing a student to respond to the ACG questions. This will increase the likelihood that we will provide ACG data to schools for students who meet the basic ACG eligibility requirements.

For more information about the ACG self-identification process, see the *2007-2008 Summary of Changes for the Application Processing System* on the FSAdownload Web site at fsadownload.ed.gov and the IFAP Web site at ifap.ed.gov.

For more information about ACG operational, eligibility, and award guidance, as well as for general HERA information, see the [Higher Education Reconciliation Act of 2005 \(HERA\) Information](#) link on the home page of the IFAP Web site at ifap.ed.gov.

Section 3, Record Layout Changes

ISIR Changes

The ISIR contains all information reported on the FAFSA as well as key processing results and NSLDS financial aid history information. The 2007-2008 ISIR record layout follows the order of the paper FAFSA questions.

Refer to Section 4, Processing Codes, for the 2007-2008 ISIR Cross-Reference Table, a comparison of the ISIR field number, start and end positions, and field values with the coinciding 2006-2007 ISIR field data.

Changes have been made to the 2007-2008 ISIR based on data element changes on the FAFSA, at the CPS, and in NSLDS. Some of these changes are summarized below with the ISIR field numbers, which are different than the FAFSA field numbers, enclosed in parentheses:

- **Two Questions Deleted on FAFSA** – To match the changes to the FAFSA, we deleted two ISIR fields. The 2006-2007 ISIR fields Interested in Work-Study? and Interested in Student Loans? were deleted and replaced with a new question, Interested in Work-Study or Student Loans? (29).
- **Added New ISIR Fields for New FAFSA Questions** – The new field labels and numbers are:
 - Are you on active duty in U.S. Armed Forces? (57)
 - Parent Supplemental Security Income Benefits (74)
 - Parent Food Stamp Benefits (75)
 - Parent Free or Reduced Price School Lunch Benefits (76)
 - Parent TANF Benefits (77)
 - Parent WIC Benefits (78)
 - Student Supplemental Security Income Benefits (95)
 - Student Food Stamp Benefits (96)
 - Student Free or Reduced Price School Lunch Benefits (97)
 - Student TANF Benefits (98)
 - Student WIC Benefits (99)
 - Filler (198)

- **Modified Valid Content in the Following Fields**

- Modified the valid content for the Enrollment Status (28) field. The value of 5 changed from Not Sure to Don't Know
 - Modified the valid content description for value 4 in the Student's Type of 2006 Tax Form Used? (36) and Parents' Type of 2006 Tax Form Used? (80) fields. Value 4 now reads, "A tax return with Puerto Rico, a U.S. territory or freely associated state"
- **Relocated the Enrollment Status Question** – Enrollment Status was moved up under the Grade Level in College field from under the 2006-2007 Federal School Code #6 Housing Plans field.

Global Changes

- **Record Length** – The ISIR Record Layout and the Request Title increased by 375 bytes, from 2600 bytes to 2975 bytes. The increase is attributed to the new FAFSA fields and NSLDS fields that were added for the ACG, the National SMART Grant, and the Graduate PLUS Loan.
- **Cycle Year Updates** – Updated all dates in field names and valid content.

CPS Data Element Changes

- **Increased the Field Length**
 - Filler field (292) increased from 10 bytes to 23 bytes
 - Correction Flags (265), Highlight Flags (266), and FAFSA Data Verify Flags (267) increased from 120 to 135 bytes

NSLDS Data Element Changes

- **Added the Following NSLDS Fields** – NSLDS will send up to three ACG and three National SMART Grant data records for each student to the CPS, as well as information regarding ACG or National SMART Grant overpayments. It will also send a new flag for the Graduate PLUS Master Promissory Note status. CPS will include this information on the ISIR. Because of these changes, we added the following NSLDS fields to the ISIR.
 - NSLDS ACG Grant Overpayment Flag (296)
 - NSLDS ACG Overpayment Contact (297)
 - NSLDS National SMART Grant Overpayment Flag (304)

- NSLDS National SMART Grant Overpayment Contact (305)
- NSLDS ACG Payment Change Flag (331)
- NSLDS National SMART Grant Change Flag (332)
- NSLDS Additional ACG Flag (335)
- NSLDS Additional National SMART Grant Flag (336)
- NSLDS Direct Loan Graduate PLUS Master Prom Note Flag (339)
- Filler (352, 363, and 374)
- NSLDS ACG Sequence Number (375, 385, and 395)
- NSLDS ACG School Code (376, 386, and 396)
- NSLDS ACG Transaction Number (377, 387, and 397)
- NSLDS ACG Last Update Date (378, 388, and 398)
- NSLDS ACG Amount Paid to Date (379, 389, and 399)
- NSLDS ACG Award Amount (380, 390, and 400)
- NSLDS ACG School Year (381, 391, and 401)
- NSLDS ACG Eligibility Code (382, 392, and 402)
- NSLDS ACG High School Program Code (383, 393, and 403)
- NSLDS ACG Sequence Code (384, 394, and 404)
- NSLDS SMART Grant Sequence Number (405, 414, and 423)
- NSLDS SMART Grant School Code (406, 415, and 424)
- NSLDS SMART Grant Transaction Number (407, 416, and 425)
- NSLDS SMART Grant Last Update Date (408, 417, and 426)
- NSLDS SMART Grant Amount Paid to Date (409, 418, and 427)
- NSLDS SMART Grant Award Amount (410, 419, and 428)
- NSLDS SMART Grant School Year (411, 420, and 429)
- NSLDS SMART Grant Classification of Instructional Programs Code (412, 421, and 430)
- NSLDS SMART Grant Sequence Code (413, 422, and 431)
- **Modified Field Length**
 - NSLDS Pell Percent Scheduled Award Used (1-3) (350, 361, and 372) increased from 5 bytes to 7 bytes

- **Modified the Following Valid Content:**
 - Added the three values to the NSLDS Post-Screening Reason Code (274)
 - 16 = Grad PLUS MPN status change
 - 17 = Fraud Conviction added
 - 18 = Fraud Conviction resolved
 - Added F = Fraud as valid content to the following nine fields:
 - NSLDS Pell Overpayment Flag (298)
 - NSLDS SEOG Overpayment Flag (300)
 - NSLDS Perkins Overpayment Flag (302)
 - NSLDS Loan (1-6) Type Code (433, 453, 473, 493, 513, and 533)
- **Modified Field Names** – Many of the NSLDS field names have been modified to be more descriptive. Please refer to the ISIR Cross Reference Table in Section 4 of the *2007-2008 EDE Technical Reference* to view these changes.
- **Modified Loan Program Codes** – Added two new loan program codes for Graduate PLUS Loans; D3 is for Direct Loan Graduate PLUS and GB is for Graduate PLUS Loans.

Section 4, Processing Code Changes

2007-2008 ISIR Cross-Reference

Updated the cross reference to reflect the 2007-2008 changes.

Table of Reject Codes and How to Respond to Each

- We incremented the date of birth end-year references in Rejects A and B, which alert FAAs that the date of birth entered may be in error because the student is older than most students (greater than 75) or younger than most students (less than 16) pursuing a post-secondary education:
 - Reject A – Date of birth year equals 1900 through 1932.
 - Reject B – Independent student and date of birth equals 09/01/91 or greater, and date of birth is not equal to or greater than current year.

Record and Transmission Error Messages

- Updated year indicator in error 13.

Assumption Overrides

- Updated the tax year in Assumption Overrides 5 and 6.

Field Name and Position Cross-References

- The layout of the table was changed.
 - The FAFSA Field Name column was moved next to the SAR Field Name column.
 - The SAR Field # and FAFSA # columns were combined because these fields now contain the same information.
 - A new CPS Corr # (number) field column was added. This column defines which number is used to submit a correction to that field in the Correction Record Export Record Layout. Previously the SAR Field # column was used.

NSLDS Loan Program Codes

- Added D3 as a loan program code for Graduate PLUS Direct Loans
- Added GB as a loan program code for Graduate PLUS Loans

NSLDS Loan Current Status Codes

- Added FD as a loan current status code for a defaulted loan that was obtained fraudulently
- Added FR as a loan current status code for a loan that was obtained fraudulently

Correction Data Entry Specifications

- **Renamed the SAR # Column to CPS Corr #** – We made this change because the CPS needs a unique sequential number to identify each field for correction purposes. In the past, SAR corrections were submitted using the data field's number. Because we now have four college choices and housing codes on the paper FAFSA (numbered 97a to 97h) and six on the Web (numbered 97a to 97l), the SAR numbers are no longer sequential and cannot be used to submit correction data.

In order to have a single set of field numbers for processing corrections, we have assigned an internal, sequential number (the CPS Corr #) to each data element. This number will be the same as the SAR number up to the college choice fields. At this point the CPS Corr # will continue to be sequential and will differ from the SAR number. You will use the CPS Correction # (CPS Corr #) as the CPS Correction Number in the Correction Export Record Layout, which is found in Section 3, instead of the SAR # as in previous years.

Message Class Changes

- The process year in all message classes changed from 07 to 08.

Section 5, Printing Changes

Section 5 describes the ISIR printed from EDEExpress.

Note: You can choose not to print ISIRs from the Department of Education's (ED's) software, EDEExpress, and instead print them from your own system. You are not required to print the ISIR output document exactly as the EDEExpress software prints it. For more information on printing ISIRs refer to Section 5, Printing, in this technical reference.

Changes to the 2007-2008 printed ISIR are as follows:

Global Changes

- **Year References** – All year references have been incremented by one year.
- **Renumbered** question numbers and switched order of the ISIR to match the order of the FAFSA.

Deleted Fields

- We deleted four data elements to allow the addition of three new questions required by the Higher Education Reconciliation Act (the HERA). Deleted are:
 - Two college and housing choices (2006-2007 questions 94 to 97).
 - 2006-2007 questions 27 and 28, asking if the student is interested in loans or work-study were deleted and replaced with one new question 26, asking “What types of student aid interest you? See Notes page 2 and enter the correct number in the box.”

Added Fields

- **CPS Data Elements Added Per the HERA** –
 - A new dependency question 54 allows a student serving on active duty in the U.S. Armed Forces for purposes other than training to be considered independent.
 - Two questions (five separate elements, questions 71-75 and 92-96) for parents and for students, ask whether they or anybody else in the household (as defined on the FAFSA) received benefits from any of five federal means-tested benefit programs in 2006. A parent/student who receives such a benefit and has an income at a certain level may qualify for a simplified EFC calculation or an automatic zero EFC calculation.

- **NSLDS Data Elements Added Per the HERA –**

- Added new ACG and National SMART Grant Overpayment Flags and Contact Codes.
- Added new ACG and National SMART Grant data detail records (3 each).
- Added Grad PLUS DL MPN Flag.

Introduction

This section provides a more detailed description of the Electronic Data Exchange (EDE) process. It provides instructions for each of the individual processes within EDE including the electronic Free Application for Federal Student Aid (FAFSA), Renewal FAFSA, Renewal Reminders, Institutional Student Information Records (ISIRs), and electronic corrections.

Electronic FAFSA

The electronic FAFSA process allows destination points to enter FAFSA data and send it to the Central Processing System (CPS) for processing. The FAFSA data is collected on a paper FAFSA. After the CPS processes the data, the results of the electronic FAFSA are transmitted back to the destination point.

The FAFSA data is submitted in the EAPS08IN message class and processing results are returned in the IDAP08OP message class.

FAA Access to CPS Online allows financial aid administrators (FAAs) to enter and transmit FAFSA information using the Internet. However, schools can choose to develop their own software. The remainder of this section includes specifications for developing software to provide the required electronic FAFSA functions.

Electronic FAFSA Process

The Electronic FAFSA process involves five steps:

1. The student submits a completed and signed paper FAFSA to the school.
2. The information on the FAFSA is key-entered.
3. The file is formatted and transmitted to the CPS through the Student Aid Internet Gateway (SAIG).
4. The FAFSA data is edited and corrected until a clean data file is created. The CPS edits the data for inconsistencies. The data elements for each field must be in the valid range with no inconsistencies in the data. For example, if a student indicates a marital status of single, yet provides income earned from work for student and spouse, an edit is triggered at the CPS.
5. The CPS transmits processed FAFSA records back to the destination point as Institutional Student Information Records (ISIRs) under the message class IDAP08OP.

Receiving the Completed Paper FAFSA

Schools participating in Electronic Application submission must have their students complete and sign paper FAFSAs. The Department of Education (ED) provides the FAFSA forms. The school must keep the completed and signed document on file.

Entering and Formatting the FAFSA Information

As part of the FAFSA entry and formatting, you are responsible for ensuring that the data meets the field-by-field criteria provided in the “Valid Content” column of the FAFSA Application Export Record Layout. The record created by your system or software must adhere to the record layout provided in the Record Layout section with the addition of a Carriage Return/Line Feed (CR/LF, ASCII 13, 10 HEX 0D, and 0A respectively) at the end of each record. Use of an end-of-file mark (ASCII 26 or HEX 1A) is optional. FAFSAs with invalid dates or formats are rejected.

Transmitting the Records

Use EDconnect, the transmission software provided by ED, to format your data records and transmit them over SAIG.

Receiving Processed Records

You receive your processed FAFSA records in ISIR format in the IDAP08OP message class.

Note: See the Printing section for more information on printing ISIRs.

Rejected FAFSA Records

There may be instances when the CPS does not accept your records for processing. The CPS returns a rejected electronic FAFSA error report to you in the message class EAPR08OP. The Record Layouts section contains the EDE Record Level Error Report Import Record Layout. The Processing Codes section contains additional information on the reject reasons found in the record layout.

The two categories of rejections for submitted FAFSA records are:

- **Transaction Rejects** – A transaction reject prevents the FAFSA record from being processed. If a record is rejected for one or more reasons, an error report is returned to the school in message class EAPR08OP (see the EDE Record Level Error Report Import Record Layout in the Record Layouts section) and no ISIR is created. These rejects are also known as record level rejects.
- **Compute Rejects** – The CPS contains a series of edits that evaluate data on incoming FAFSA records for consistency and completeness. These edits apply to all data from electronic and paper input. The CPS does not compute an Expected Family Contribution (EFC) for a FAFSA rejected for a compute reject reason. However, an ISIR is produced. ISIRs with a compute reject are returned in the IDAP08OP message class. The reasons for the compute reject are coded on the ISIR. Refer to the Processing Codes section for information on interpreting these reject codes.

In the paper system, a student can verify a data field by reentering the same information in the Student Aid Report (SAR) correction column for the field in question. In the electronic process, the school verifies the data (reenters the data as a “correction”) and transmits the correction record to the CPS. Data that must be verified or corrected in response to each reject reason is provided in the Processing Codes section.

A student’s record will not have an EFC if the record contains questionable data and has FAFSA reject reason codes, which are located in positions 708 through 721 on the ISIR. Procedures for responding to the codes may be found in the section titled “Table of Reject Codes and How to Respond to Each” in Section 4 of this technical reference.

Renewal FAFSAs and Renewal Reminders

Each year the Central Processing System (CPS) creates a Renewal Free Application for Federal Student Aid (FAFSA) for students who are eligible to participate in the renewal application process. The Renewal FAFSA is a tremendous timesaver for students as responses from the prior cycle's FAFSA or Renewal FAFSA are displayed, and the applicant must answer only questions that are likely to have changed from the previous year.

Federal Student Aid is making one significant change to the 2007-2008 renewal application process: the second Renewal Reminder distribution, introduced in 2006-2007, has been eliminated. Instead, a single Renewal Reminder distribution will occur, beginning in mid-January 2007.

Based on feedback from the financial aid community, we will send Renewal Reminders only one time in 2007-2008, beginning in January 2007. You told us that sending the reminders closer to system start-up would be more effective for your students, rather than sending them once in November and again in February (as we did in 2006-2007).

Students who are eligible to apply for aid using the Renewal FAFSA application for 2007-2008 and who qualify for reminders by January 12, 2007 will be included in our single distribution of Renewal Reminders that will begin in January. The Renewal FAFSA selection period has been extended by 11 weeks to enable as many eligible students as possible to receive Renewal Reminders and still meet important state deadlines in late February and early March.

Refer to the *Renewal FAFSA Process Guide* (located on the IFAP and FSAdownload Web sites) for complete details about the 2007-2008 renewal application process. The *Renewal FAFSA Process Guide* provides useful information about the process, including a summary of the major changes to the process, a schedule of important dates, and a sample of the Renewal Reminder e-mail.

ISIR

The ISIR is a fixed-length record containing reported information from the FAFSA, as well as key processing results. The CPS sends the ISIR electronically to institutions that the student has indicated he or she plans to attend. Generally, all information printed by the CPS on the paper SAR is coded in the ISIR File.

Note: The average CPS processing time is between 48 and 52 hours.

NSLDS Data

The ISIR includes National Student Loan Data System (NSLDS) information, which is located at the end of the ISIR Record Description.

ISIR Datamart

The ISIR Datamart is the centralized location for all ISIR data generated by the CPS. Schools, state agencies, and other authorized users receive ISIR distributions from the datamart through the Student Aid Internet Gateway (SAIG).

You can use Federal Student Aid's Participation Management System to establish your school's preferences regarding receiving "daily" ISIR files or requesting ISIR files from the ISIR Datamart. For more information visit the SAIG Enrollment Web site at:

fsawebenroll.ed.gov

"Daily" ISIRs and requested ISIRs are described in more detail on the following pages.

ISIR Receipt Process

The CPS transmits ISIR records to the SAIG. Descriptions of the contents of the ISIR record are in the Record Layouts section.

ISIR Types

The CPS produces three general ISIR types:

- **Daily ISIRs.** Schools can receive “daily” ISIRs or request specific ISIR records or groups of records from the ISIR Datamart. Daily ISIRs are generated daily in response to FAFSAs or corrections entered by you or at a site other than your school. The CPS sends these ISIRs to school destination points in the IGCO08OP, IDAP08OP, and IDSA08OP message classes.

All users, by default, are set up for the daily ISIR distribution preference. This preference can be updated at any time in Federal Student Aid’s Participation Management System. You can also control how and when to receive ISIRs at your school based on the preferences or needs of your institution.

If you select daily receipt of ISIRs, you can also use the datamart as needed to request ISIRs. All ISIR transactions for each student are stored in the datamart and are available for retrieval upon request. The FAA Access to CPS Online Web site enables you to submit requests to the datamart for specific ISIR data based on query criteria.

Daily and pushed ISIR data files are stored for retrieval in your SAIG mailbox under current retention and archival guidelines.

- **Requested ISIRs.** Requesting ISIRs is a simple process that enables you to receive only the ISIRs you need. You use the ISIR Request feature on the FAA Access to CPS Online Web site to request ISIRs from the datamart. The CPS returns these ISIRs to the school in the ISRF08OP message class. You can submit a query request to the datamart for duplicate ISIRs, year-to-date (YTD) files, or federal data request (FDR) files (for state agencies only). There is no limit to the number of times you can request the same ISIR.

Your school must be listed on the specific ISIR transaction you are requesting for the request to be successfully processed.

As queries are run against the datamart, files of requested ISIRs are generated and sent to you through the SAIG. These files must be retrieved from your SAIG mailbox within 14 calendar days or they will be deleted (and cannot be restored). If this occurs, you can resubmit the same request to the datamart and the data will be generated and sent to you again.

You can view the request date and request status any time after submitting a request. If the request has been processed, you can also view the request completion date and the number of ISIRs that were sent. You can submit as many query requests to the ISIR Datamart per day as necessary to retrieve the data you require.

Titles must be added to the query requests you submit, and the title you enter will be returned in the ISIR file you receive as a result of your request. This will assist you in matching ISIR files to individual requests you have submitted to the datamart.

When you return to FAA Access to CPS Online to enter a new ISIR request, your most recently completed or pending requests are displayed. Rather than creating a new query, you can save time by using a prior query again to request ISIRs, provided the parameters still apply. You may want to modify the title of the request to distinguish it from other requests you have previously submitted.

For your convenience, queries can be set up to run on a future date. For example, you can set a date in the future to receive all ISIRs processed on or before key deadlines at your school or state agency.

If you want your query to run as soon as possible, simply leave the execute date blank and your query will run after the next CPS compute.

- **Automatically Pushed ISIRs.** Certain ISIR transactions are automatically distributed (or “pushed”) to you, regardless of the ISIR delivery option selected in the Participation Management System. This process assists you in meeting requirements for reviewing relevant ISIR data for your students before and after disbursement of financial aid awards. ISIRs that are generated and automatically returned to the school are sent in the IGSA08OP, IGSG08OP, and IGAA08OP message classes.

When your Federal School Code is listed on the following types of transactions, a system-generated ISIR (IGSG08OP or IGAA08OP) is automatically pushed to your school:

- CPS reprocessing
- Department of Homeland Security (DHS) automated secondary confirmation
- NSLDS Post-Screening
- Only ACG data was provided on a transaction

When a correction record processed by the CPS results in one of the following changes on the new transaction, the school that submitted the correction receives the transaction in a daily ISIR file (IGCO08OP), while all other schools listed on the transaction will receive a pushed ISIR file (IGSA08OP):

- Reject Status changes (records that change from a rejected status to having a calculated EFC or from having a calculated EFC to a rejected status)
- Verification Status changes (not selected to selected)
- EFC changes

- SAR C Code changes

Pushed ISIR files are sent to state agencies in the IGRE08OP or IGNR08OP message classes (for resident and non-resident transactions, respectively).

Pushed ISIR data files are stored for retrieval in your SAIG mailbox under current retention and archival guidelines.

Each school subscribing to the “daily ISIR” service receives one ISIR for every student who lists that school on the FAFSA. Regardless of the service for which a school has enrolled, all schools receive “pushed ISIRs.” Servicers receive only one ISIR per destination point. For message class details, state agencies should refer to the State Agencies information later in this section.

ISIR Message Classes

The CPS generates ISIRs in response to input from students or schools. This includes such input as FAFSAs, FAFSA corrections, and CPS-generated transactions. The CPS transmits school-requested ISIRs to the SAIG in one of the following message classes:

- **ISRF08OP – Requested ISIRs**

The CPS returns ISIRs in this message class to the school in response to ISIR Datamart requests through FAA Access to CPS Online. The school receives one ISIR for every record that meets the ISIR query criteria.

- **IGSA08OP and IGSG08OP – Pushed ISIRs**

ISIRs in these message classes are automatically pushed to the school because of transactions processed by the CPS. These transactions require you to take some sort of action. An example of a pushed ISIR would be a student-initiated correction that causes a change to the EFC. We have listed below the instances when the CPS system pushes an ISIR for a student.

- EFC value change
- SAR C Flag change between transactions
- CPS reprocessing of records
- CPS receives changed information through NSLDS Post-Screening or DHS Secondary Match
- Records selected for verification
- Rejected records that now have an EFC
- Records that previously had an EFC but are now rejected

- **IGAA08OP – Pushed ISIRs for ACG Data Corrections**

ISIRs are automatically pushed to the school when students have supplied data for the new Academic Competitiveness Grant (ACG) questions. If only the ACG data was entered, the ISIR will be in the IGAA08OP message class.

- **IGCO08OP, IDAP08OP, and IDSA08OP – Daily ISIRs**

The CPS generates ISIRs in these message classes daily in response to FAFSAs or corrections entered by you or at a site other than your school or state agency. These ISIRs are generated in response to the following documents:

- Paper FAFSAs or SARs processed by the Image and Data Capture (IDC) processor
- Electronic FAFSAs, Renewal FAFSAs on the Web, or Corrections on the Web
- Electronic FAFSAs or corrections on FAA Access to CPS Online
- Electronic FAFSAs or corrections by another EDE school or third-party servicer

Important Information about ISIR Files

- **Schools Must Obtain ISIRs for All Eligible Students.** Although the flexibilities and options provided to schools through use of the ISIR Datamart are extensive, we want to remind you that you are obligated to obtain ISIRs for all eligible students who enroll at your school.
- **Develop an ISIR Request Process.** We highly recommend that you develop a process for requesting ISIRs from the datamart that takes into account your ongoing student admissions process as well as the tracking and monitoring of existing students with paid-on ISIR transactions.
- **Review ALL Pushed ISIRs.** Your school *must* review all pushed ISIRs and assess any potential impact to your students' aid eligibility, regardless of whether or not you select the "daily" ISIR distribution.
- **Schools Choosing NOT to Receive Daily ISIRs.** Schools that elect not to receive daily ISIRs and instead request specific ISIR transactions from the datamart *must* continue to review ISIR transactions for all enrolled students.

State Agency Options

State agencies can combine processed FAFSA data from CPS with common loan application data to guarantee federal student loans and/or with state data to award state scholarships and grants.

As destination points, state agencies can automatically receive ISIRs from the CPS or request ISIRS from the ISIR Datamart. The message classes used by state agencies for 2007-2008 are listed below.

IDNR08OP	Daily State Agency ISIR Non-Resident
IDRE08OP	Daily State Agency ISIR Resident
IGNR08OP	CPS Pushed State Agency ISIR Non-Resident
IGRE08OP	CPS Pushed State Agency ISIR Resident
ISRF08OP	Requested ISIR Data from the ISIR Datamart

You can set up your ISIR request preference in the Participation Management System. For more information regarding the Participation Management System, contact CPS/SAIG Technical Support through e-mail at CPSSAIG@ed.gov, or at 800/330-5947.

Electronic Corrections

Schools with destination points enrolled for electronic correction processing are able to transmit corrections to FAFSA data through FAA Access to CPS Online.

FAA Access to CPS Online allows schools to enter and edit correction data according to the CPS system requirements. Schools, however, can choose to develop their own software or system to enter, edit, and format correction data. We provide specifications for developing correction software in the remainder of this section.

You submit correction data in the CORR08IN message class and the CPS returns the resulting ISIR in either the IGSA08OP or the IGCO08OP message class.

General Correction Entry Specifications

You transmit only corrected information from a student's record, not the complete applicant record, to the CPS. This approach minimizes the transmission volume. Correction information is transmitted as a fixed-length record. The layout and description of this record is in the Correction Export Record Layout (CORR08IN) in the Record Layouts section.

Creating a Correction Record

Use the following steps to create a Correction record:

1. In the first position of the record, enter **8** to indicate this is a correction to a 2007-2008 applicant transaction.
2. In positions 2 through 10, enter the applicant's original Social Security Number (SSN). This is the number reported by the applicant on the FAFSA form and does not reflect any corrections to the SSN that might have been made.
3. In positions 11 and 12, enter the first two letters of the original applicant's last name. These are the letters reported by the applicant on the FAFSA form and do not reflect any corrections to the last name that might have been made.

4. In positions 13 and 14, enter the transaction number of the applicant ISIR being corrected. For example, enter **01** to correct the first transaction on file at CPS. The transaction does not necessarily have to be the latest one on file at CPS. If the transaction number being corrected is not on the CPS database, the record is rejected. To correct the most recent transaction, enter **99**.

Note: When making a correction using transaction 99, you must also provide corrections to CPS Correction Number (CPS Corr #) 097 (the first Federal School Code), field number 126 (DRN), and the signatures on the record.

5. In positions 15 through 17, enter the CPS Corr # of the field being corrected. Each correctable field has a three-digit CPS Corr # associated with it. For example, enter **001** to correct the student's last name. We have provided the CPS Corr # with valid content in the Correction Data Entry Specifications Table found in the Processing Codes section.
6. In positions 18 through 52, enter the new value for the field being corrected.
7. Optional: In positions 53 through 470, you can enter or correct other student data fields. See the second note below for more information.
8. Optional: In positions 471 through 520, enter or correct the student's e-mail address.
9. In positions 521 through 522, enter **1C** for the transaction data source/type code.
10. In positions 523 through 530, enter the transaction receipt date. Enter the date you are making the correction. The CPS will update this information on the ISIR with the date the CPS received this correction.
11. You can set assumption override codes (1 to 6) in positions 531 through 536 and reject override codes for reject 3, 12, A, B, C, G, J, K, N, and W in positions 537 through 548.
12. In positions 549 through 554, enter the Federal School Code of the school making the correction.

Note: To correct a field to blank, enter a single asterisk (*) left justified in that field. The Correction Data Entry Specification Table in Section 4 distinguishes which fields you may correct to blank. Not all fields may be corrected this way.

Note: Up to 12 SAR data fields can be corrected on a single record. If you are correcting more than one field, repeat steps 5 and 6 using the remaining data fields on the correction record. If more than 12 fields require correction, you must create an additional record, repeating steps 1 through 10.

Detailed Data Entry Specifications

Each corrected value must meet certain standards; otherwise, the correction record is rejected. We have provided field-by-field data entry specifications in the Processing Codes section of this Technical Reference. For each field, these specifications identify the type (character, numeric, or signed-numeric), the acceptable length, and the valid values for the correction. The specifications also show whether the field is correctable and if it is correctable to blank.

Keep the following items in mind:

- Left justify the corrected value within the data field on the correction record, while zero-filling numeric fields up to the valid maximum length of the field and leaving blank any empty positions to the right. For example, to correct the number of family members to five, enter **05** in positions 18 and 19, leaving positions 20 through 52 blank. To correct the student's last name to Smith, enter **SMITH** (in uppercase as the layout notes) in positions 18 through 22, leaving positions 23 through 52 blank.
- A field content of all nines indicates the reported or calculated value is greater than or equal to the value of all nines. Blanks are allowable in some fields.
- Fields can contain one of three data types: character, numeric, or signed numeric.

A negative entry is acceptable for a limited number of fields. The Correction Data Entry Specifications Table in the Processing Codes section identifies the fields in which a negative is acceptable under the Justify Signed column and the Valid Content column. The Signed Numeric Fields Table on the next page defines the signed fields. In the case of signed numeric fields, the sign is always implied in the right-most character of the field. For example, if the student's adjusted gross income (AGI) contains a value of negative 3507, the record contains 00350P. Because the AGI value does not contain as many bytes as the correction field, the record must have leading zeros. The following digits are the AGI value with the exception of the last digit. To determine the last digit use the chart below. Determine if the value is positive or negative and select the corresponding value for the last digit.

The following chart explains the conversion of the sign and the number:

	0	1	2	3	4	5	6	7	8	9
Positive Values	{	A	B	C	D	E	F	G	H	I
Negative Values	}	J	K	L	M	N	O	P	Q	R

Making Signature Corrections

Signature information is required to resolve signature rejects (rejects 14, 15, and 16). You do not need to provide signature information on other standard corrections unless you are using 99 as the transaction number. If you have a transaction that was a reject 14, 15, or 16, simply correct CPS Corr # 110 (Signed By) to A (Applicant) or B (Both = Student and Parent), as appropriate.

If you need to add a signature to a student's record that is on hold for lack of signatures, you must use the layout for Signature Record Export Record Layout (SIGS08IN) found in Section 3, Record Layouts. You can correct the student or parent signature using this layout. You must make sure the student included your school on the FAFSA or correction.

Adding Your Federal School Code to Receive Electronic Data

A school cannot make an electronic correction unless the school has been designated on the applicant transaction. You can add your Federal School Code to the list of schools receiving data electronically as well as correct other fields on the record by using the Correction Record Layout (CORR08IN).

Follow these steps to add your Federal School Code and/or to make corrections:

1. In the first position of the record, enter **8** to indicate that this is a correction to a 2007-2008 applicant transaction.
2. In positions 2 through 10, enter the applicant's original SSN. This is the number reported by the applicant on the FAFSA form and does not reflect any corrections to the SSN that might have been made.
3. In positions 11 and 12, enter the first two letters of the original applicant's last name. These are the letters reported by the applicant on the FAFSA form and do not reflect any corrections to the last name that might have been made.
4. In positions 13 and 14, enter the transaction number of the applicant ISIR being corrected. For example, enter **01** to correct the first transaction on file at CPS. The transaction does not necessarily have to be the latest one on file at the CPS. If the transaction number being corrected is not on the CPS database, the record is rejected. You can use transaction 99 to add your school code to the most recent transaction on the CPS Database. Note: You cannot add

your school code to a transaction that includes an FAA Adjustment performed by another school.

5. Enter **126** in the CPS Correction Number Correction #1 field, positions 15 through 17 (corresponding to the CPS Corr #126, the Data Release Number [DRN]).
6. Enter the student's DRN in Correction Data 1 field, positions 18 through 52. Remember to left justify it and leave any unused bytes blank.

Note: The CPS has assigned a unique DRN to each Title IV applicant. It appears only on paper SARs. If a valid DRN is not present on the correction record containing the Federal School Code change, the record will be rejected.

7. Enter the CPS Corr # associated with the Federal School Code position being changed in the CPS Correction Number Correction #2 field, positions 53 through 55. Possible field numbers are 097, 099, 101, 103, 105, and 107.
8. Enter the Federal School Code in the Correction Data 2 field positions 56 through 90. Remember to left justify it and leave any unused bytes blank.

You can only change the Federal School Code to the number of the participating EDE school submitting the correction. You also must enter this number in the EDE Federal School Code field, positions 549 through 554. If the codes in these two fields do not match, the record will be rejected.

Schools can modify the Federal School Code and make other corrections to the applicant record on the same correction transaction.

9. Optional: In positions 471 through 520, enter or correct the student's e-mail address.
10. In positions 521 through 522, enter **1C** for the transaction data source/type code.
11. In positions 523 through 530, enter the transaction receipt date (the date you are making the correction). The CPS will update this information on the ISIR with the date the CPS received this correction.
12. You can set assumption override codes (1 to 6) in positions 531 through 536 and reject override codes for reject 3, 12, A, B, C, G, J, K, N, and W in positions 537 through 548.
13. In positions 549 through 554, enter the Federal School Code of the school making the correction.

Tips for Corrections

When you submit an ISIR correction to the CPS, we use the transaction number you provide in positions 13 and 14 as a template. We make changes to the fields you indicated, leaving other fields unchanged. Your Federal School Code must be one of the six listed, but it does not have to be the first college choice on the transaction to be processed by the CPS. You will receive the processed results in the IGCO08OP message class.

Only 30 transactions can be created for a student's record. After there are more than 30 transactions, the record is frozen and we do not permit any corrections to the record.

If you are submitting a dependency override or FAA adjustment (professional judgment) as part of the correction record, only your school receives the resulting corrected ISIR transaction. Also, do not send a dependency override correction with an FAA adjustment to a transaction without an EFC. If there is no EFC, first send the dependency override with any other corrections necessary to obtain an EFC. Then submit the FAA adjustment to the transaction with the dependency override and the EFC. When submitting an FAA adjustment you must submit a correction to at least one field that affects the EFC calculation.

Rejected Correction Records

The two categories of rejections for submitted correction records are:

- **Transaction Rejects** – A transaction reject prevents the correction record from being applied to the student's record. If a record is rejected for one or more reasons, the school receives an error report in message class CORE08OP (see EDE Record Level Error Report Import Record layout in the Record Layouts section). No ISIR is created.
- **Compute Rejects** – The CPS contains a series of edits that evaluate all incoming FAFSA and correction data for consistency and completeness. These edits apply to all data from electronic, Web, and paper input. The CPS does not compute an EFC for a correction rejected for a compute reject reason. However, an ISIR is produced. Correction ISIRs with a compute reject are returned in the IGCO08OP message class. The reasons for the compute reject are coded on the ISIR in positions 708 through 721. Refer to the Processing Codes section for information on interpreting these reject codes.

In the paper system, a student can verify a data field by reentering the same information in the SAR correction column for the field in question. In the electronic process, the school can verify the data (reenter the data as a “correction”) or set the appropriate reject override (found at the end of the CORR08IN Record Layout in positions 537 through 548) and transmit the correction record to the CPS. Data that must be verified or corrected in response to each reject reason is provided in the Processing Codes section.

A student’s record may not have an EFC if the record contains questionable data and has FAFSA reject reason codes. The reject reason codes are found in positions 708 through 721 on the ISIR. They explain the questionable and highlighted fields.

Introduction

This section provides all the record layouts needed for you to create your own software to participate in the Electronic Data Exchange (EDE) process.

Request Title in ISIR Files

To identify the group of ISIRs belonging to your datamart requests, a request title for each query is returned in the resulting ISIR file sent to your school. The title appears as the first detail line in the ISIR file after the SAIG header record. The title will be in positions 1 to 50. Positions 51 to 2975 will be blank.

In addition, to ensure that the ISIR data from CPS for all ISIR records is consistent for your school's software, this request title is part of the daily and pushed ISIR files you receive. For these ISIR files, the first detail line contains all blanks in positions 1 to 2975. Examples are listed below:

ISIRs received as a result of a datamart request

- Line 1: O*N05 record (SAIG header record)
- Line 2: Request Title (up to 50 bytes of description from the datamart query)
- Line 3: First ISIR record meeting request query
- Line 4: Second ISIR record meeting request query
- Line 5: O*N95 record (SAIG trailer record)

ISIR received as part of daily ISIRs or pushed ISIRs

- Line 1: O*N05 record (SAIG header record)
- Line 2: Blank line
- Line 3: First ISIR record sent to your school
- Line 4: Second ISIR record sent to your school
- Line 5: O*N95 record (SAIG trailer record)

Changes to the Correction Field Numbers

In the Correction Export Record Layout we renamed the SAR Field Number to CPS Correction Number. You will need to use the CPS Correction Number (CPS Corr #) found in the Correction Data Entry Specifications Table in Section 4 of this reference instead of the SAR Field Number when you submit your correction data.

We made this change because the CPS needs to assign a unique sequential number to fields for correction purposes. In the past the SAR numbers were sequential and were used to submit correction data. Because we no longer list the same number of college choices and housing codes on the paper FAFSA as on the Web, the SAR numbers are no longer sequential and cannot be used to submit correction data. The paper FAFSA and SAR only have space for four college choices and housing codes, numbered 97a through 97h. The Web application lists six college choices and housing codes, numbered 97a to 97l.

In order to have a single set of field numbers for processing corrections, we have assigned an internal, sequential number (the CPS Corr #) to each data element. This number will be the same as the SAR number until the college choice fields, at which point the CPS Corr # will continue to be sequential and will differ from the SAR number.

Important Notes: See the Introduction section on page 3-2 for information on the request title, which is returned as the first record of an ISIR File. The title appears as the first detail line in the ISIR File after the SAIG header record. The title will be in positions 1 to 50. Positions 51 to 3250 will be blank.

New for 2007-2008: The second column has been renamed from SAR Field # to FAFSA #. This column no longer defines the SAR number associated with the field, but instead the FAFSA number.

Correction Export Record Layout

(CORR08IN)

New for 2007-2008: We have renamed the SAR Field Number field name to CPS Correction Number. You will need to use the CPS Correction Number (CPS Corr #) found in the Correction Data Entry Specifications Table in Section 4 of this reference instead of the SAR Field Number when you submit your correction data. See page 3-3 for more information.

Field #	Start	End	Length	Changes	Field Name	Valid Content	Justify
1	1	1	1	Modified valid content	Year Indicator Indicates the cycle year to which the correction should be applied.	8, will always be "8" (for 2007-2008)	Left

Academic Competitiveness Grant (ACG) Data File Import Record Layout

(ED2008OP)

Each day after FAFSA records are processed, this data file is created to inform schools about the ACG data submitted by applicants. Each file that you receive will include all applicants for that day who have listed your school code in any of the six school choice fields on the transaction on which the ACG data was submitted. If a school code is added to a record in a subsequent correction, the ACG data will be sent to the new school.

Each student record that has ACG data submitted and is potentially eligible for the grant will have at least two of the following Comment Codes set in his or her ISIR record: 268 through 271.

Field #	Start	End	Length	Field Name	Valid Content	Justify

Introduction

This section provides tables that assist you in defining your system, submitting your data, correcting errors or FAFSA data, and other processing codes associated with the Central Processing System (CPS) Electronic Data Exchange (EDE) process.

Summary of the Tables in this Section

In this section, you will find several tables to assist you when reviewing files.

2007-2008 ISIR Cross-Reference

This table is a cross-reference of the 2006-2007 Institutional Student Information Record (ISIR) field number, start position, and end position with the 2007-2008 ISIR field number, start position, and end position. It also lists the field values (for each field) that have changed from the last award year.

Table of Reject Codes and How to Respond to Each

Use this table to determine the meaning of each reject code possible on a Student Aid Report (SAR) or ISIR. The table also outlines how to correct each reject and references comment code numbers associated with the rejects.

Record and Transmission Error Messages

This table reports the Record Reject codes (3 to 16) and the Transmission Error codes (17 to 18). The table lists the actual text for each reject code, a description of the error, and a resolution for each error. The record error messages indicate that the individual student record was not processed. You will need to fix any student record with a record error message and send it to the Central Processing System (CPS) again for processing so an ISIR is generated. Transmission errors are problems with the transmission of the records.

Assumption Overrides

This table associates the override codes with the assumption the CPS is making during processing. It also explains what happens if you use this code and provides an example of when you would use this code.

Field Name and Position Cross-References

Use this table to determine which fields were verified or corrected in the previous transaction or which fields are highlighted on the ISIR. It also defines the field positions for the SAR field, the FAFSA field name, and the question number on the FAFSA.

NSLDS Loan Program Codes

Use these codes to determine the type of loan program of up to six loans in the NSLDS portion of the ISIR Record Description/Data Dictionary found in the Record Layouts section of this technical reference.

NSLDS Loan Current Status Codes

Use these codes to determine the current status of any of the loans (up to six) in the NSLDS portion of the ISIR Record Description/Data Dictionary, which is found in the Record Layouts section of this technical reference.

State/Country/Jurisdiction Codes

Use this table to determine the valid state abbreviations used for the following fields found throughout the Record Layouts section of this technical reference:

- Student's Permanent State
- Student's Driver's License State Code
- Student's State of Legal Residence
- Parents' State of Legal Residence

Correction Data Entry Specifications

You may use this table in conjunction with the Correction Export Record Layout found in section 3, Record Layouts. The table defines the CPS Correction Number and field length. It defines what data is valid to send for each field on a correction record. The table also indicates if the CPS Correction Number field is a signed value, the justification of the field, and if the field can be corrected to blank.

Message Classes

This table lists the message classes associated with application processing.

Comment Codes

For a complete listing of SAR codes, comment text, and changes, see the companion document to the *2007-2008 EDE Technical Reference* entitled *2007-2008 SAR Comment Codes and Text*. This document can be found on the U.S. Department of Education's Federal Student Aid Download (FSAdownload) Web site located at fsadownload.ed.gov, as well as on the Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

New Comments

We briefly describe the new comments for 2007-2008 that were added as a result of the HERA and edit changes below:

Comment	Condition
126	Dependent student who supplied parental data that appears to meet the income requirement for tax filing, but reported a tax return would not be filed
131	Independent student who supplied data that appear to meet the income requirement for tax filing, but reported a tax return would not be filed
163	Student's Worksheet A income is equal to the Parent's Worksheet A income
174	Student attempting to add a school code to a transaction that has an FAA Adjustment applied
240 to 244 246	Student's record is flagged for potential ACG overpayment
247	Parent reported SSI benefits but did not include income on Worksheet A
248	Student reported SSI benefits but did not include income on Worksheet A
249	Parent reported TANF benefits but did not include income on Worksheet A
250	Student reported TANF benefits but did not include income on Worksheet A
261 to 266	Student's record is flagged for potential National SMART Grant overpayment

Printing ISIRs

You are not required to print your Institutional Student Information Record (ISIR) output document exactly as the Department of Education's (ED's) software, EDEExpress, prints it. You can print additional information on the ISIR. Included in this section is the table, ISIR Fields Not Printed on the ISIR. It contains all the ISIR fields that EDEExpress does not print on the ISIR. An example of an ISIR printed from EDEExpress is included at the end of this section for your reference.

The following information describes how EDEExpress prints values. We have provided it to assist the school or state agency in printing the data on an ISIR.

Printing Assumed Values

Assumed Values reflect suppositions the Central Processing System (CPS) has made in determining the applicant's Expected Family Contribution (EFC). The CPS makes assumptions when the applicant does not report certain information that is necessary for the EFC calculation or when the applicant reports inconsistent information. (Some unreported information results in a rejected transaction rather than assumptions.) The CPS uses the assumed value when calculating the EFC.

For certain fields, the only assumption the CPS ever makes is zero so these assumption fields on the ISIR contain zeros (for example, ISIR field 175, Assumed Student's U.S. Tax Paid). On the ISIR, EDEExpress prints an asterisk (*) to the left of the field title to indicate that the CPS made an assumption and the assumed value must print in place of the reported value.

If a field is both assumed and highlighted, EDEExpress would print an asterisk (*) to the left of the field title. For more information on highlighted fields, see the Printing Highlight Flags information later in this section. Positions 729 through 801 of the ISIR all contain CPS assumption fields.

Printing Intermediate EFC Values

An intermediate EFC is a value used during the EFC calculation process. EDEExpress prints the intermediate EFC values as calculated by the formula type.

FAFSA Data Verify Flags

FAFSA Data Verify Flags are found on the ISIR (positions 1509 through 1643.) Each FAFSA Data Verify Flag byte corresponds to a specific Student Aid Report (SAR) field and indicates fields corrected to the same value on the transaction being corrected. Refer to the Field Name and Position Cross-References Table in section 4.

If a field was verified as the same data as the transaction being corrected, the FAFSA Data Verify Flag contains a value of 1. A value of 0 (zero) signifies that this field was not corrected to the same value and a value of 2 means the CPS has asked that the field be verified.

EDEExpress does not print these flags on the ISIR. These flags were added at the request of third-party servicers to assist them when doing correction edits.

Printing Correction Flags

Correction flags on the ISIR (positions 1239 through 1373 on the ISIR layout) indicate changes to FAFSA data processed by the CPS. Refer to the Field Name and Position Cross-References Table in section 4.

If a field was corrected on the current transaction, the correction flag contains a value of 1. If a field was corrected on a previous transaction, the correction flag contains a value of 2. All other correction flag fields contain a value of 0.

EDEExpress prints a pound sign (#) on the ISIR to the right of the field variable that was corrected on the most current transaction, and prints an at sign (@) to the right of the field variable that was corrected on a previous transaction.

Correction flags are cumulative (for example, the flag is carried on all subsequent transactions).

On the ISIR, EDEExpress does not actually print the data in this field. Rather, it uses this data to determine which fields have a pound sign (#) or an at sign (@) printed to the right of the field variable to show that the field has been corrected from the original application.

Printing Highlight Flags

Highlight flags on the ISIR (positions 1374 through 1508 on the ISIR layout) indicate data highlighted in boldface on the SAR, based on FAFSA data processed by the CPS. Refer to the Field Name and Position Cross-References Table in section 4. These fields are highlighted and provide a comparison reference between the SAR question number and ISIR field position.

Any field containing a highlight flag contains a value of 1. All other highlight flag fields contain a value of 0.

On the ISIR, EDEExpress prints the letter *h* to the left of the field title that was highlighted. If the field is both highlighted and assumed, an asterisk (*) prints to the left of the field title instead of an *h*.

EDEExpress does not actually print the data in this field. Rather, it uses this data to determine which fields print an *h* to the left of the field title to show that the field was highlighted.

Rejected ISIRs

Applications and corrections submitted to the CPS, regardless of the input type or source, can be rejected for incomplete, illogical, or inconsistent data.

An EFC is not computed for a rejected application transaction. Transactions can be rejected for multiple reasons. Up to seven two-digit reject reason codes are carried on the ISIR.

The reject reason codes and resolution in response to each reject reason are described in the Table of Reject Codes and How to Respond to Each subsection within section 4, Processing Codes.

Comments

Up to 20 three-digit numbers can appear on the ISIR record, indicating which comments would appear on Part One of a SAR from any paper application processor. Some comments contain critical information regarding the student's status. The comment text that prints on the ISIRs can be found in the *2007-2008 SAR Comment Codes and Text* document found on the U.S.

Department of Education's Federal Student Aid Download (FSAdownload) Web site located at fsadownload.ed.gov, as well as on the Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

NSLDS Page

The ISIR record contains NSLDS information. EDEExpress only stores the most recent NSLDS transaction. As a result, when the ISIR is printed from EDEExpress the transaction number for the student's NSLDS record may not match the transaction number of the ISIR being printed. You should always print the NSLDS information with the highest transaction number no matter what the transaction number of the ISIR being printed.

Field Types

Fields can contain one of three types of data: character, numeric (N), or signed numeric (S/N). A content of all nines in a field indicates that the reported or calculated value is greater than or equal to the value of all nines. Blanks are allowable in some S/N and N fields.

With S/N fields, the sign is always implied in the right-most character of the field. For example, if the Student's Adjusted Gross Income field contains a value of negative 3507, it would appear as 00350P. The following chart explains the conversion of the sign and the number:

Signed Numeric Fields:

	0	1	2	3	4	5	6	7	8	9
Positive Values	{	A	B	C	D	E	F	G	H	I
Negative Values	}	J	K	L	M	N	O	P	Q	R

Note: All signed fields print an extra byte.

Other Field Notes

When the Is Student Selected for Verification field in position 1809 on the ISIR layout is populated, EDEExpress prints the value. If the value contains a Y, then an asterisk (*) is printed next to the EFC.

Additionally, EDEExpress does not print the value in the Electronic Federal School Code Indicator field. Instead, it prints the Federal School Code number associated with the value. For example, if the Electronic Federal School Code Indicator equals 3, EDEExpress prints the value for the Federal School Code #3 field.

READ, SIGN, AND DATE

If you are the student, by signing this application you certify that you (1) will use federal and/or state student financial aid only to pay the cost of attending an institution of higher education, (2) are not in default on a federal student loan or have made satisfactory arrangements to repay it, (3) do not owe money back on a federal student grant or have made satisfactory arrangements to repay it, (4) will notify your school if you default on a federal student loan, and (5) will not receive a Federal Pell Grant for more than one school for the same period of time.

If you are the parent or the student, by signing this application you agree, if asked, to provide information that will verify the accuracy of your completed form. This information may include U.S. or state income tax forms that you filed or are required to file. Also, you certify that you understand that the Secretary of Education has the authority to verify information reported on this application with the Internal Revenue Service and other federal agencies. If you sign any document related to the federal student aid programs electronically using a Personal Identification Number (PIN), you certify that you are the person identified by the PIN and have not disclosed that PIN to anyone else. If you purposely give false or misleading information, you may be fined \$20,000, sent to prison, or both.

Everyone whose information is given on this form should sign below. The student (and at least one parent, if parent information is given) MUST sign below.

Appendix

Overview

This Appendix is updated each time change pages are issued for the EDE Technical Reference. The tracking log is added for each set of change pages as they are issued, providing you with a cumulative list of the updates made to the document.

New text additions in EDE Technical Reference change pages are identified with ***bold italic*** text. Text deletions are marked with ~~striketrough~~.

When a section of the EDE Technical Reference is modified through a change page release, the footer on each page of the modified section is updated to reflect the month that the change pages were issued. For example, if a change is made to page 1-12 in January 2007, all pages in section 1 will show “January 2007” in the footer. Use the corresponding Tracking Log to identify what was revised in the section as part of a specific month’s change page posting.
